

TEXACRAFT'

Since 1975, Texacraft® has been the one-stop-shopping destination for outdoor commercial furniture. Our quality and reliability are unparalleled, as is our selection, which is why thousands of customers turn to us for their multifamily housing, hotel, casino, country club, REIT projects, and more.

When you trust us with your furniture needs, you'll experience our best-in-class customer experience, and our commitment to building strong, long-lasting client relationships during every step of the buying process. Our North American-based company is among the few with an internal sales team, and a dedicated customer service department. You have the reliability to be working with the same, real, accessible people from order to delivery. That's just the beginning of our relationship. At Texacraft®, we don't just take pride in what we do, we take pride in how we do it.

It is our pleasure to introduce our new collections and products for 2024.

Fountainhead – This mixed materials collection features solid aluminum framework with sculpted flowing lines that accentuate the organic texture of the HDPE planks featured on its seating, dining and lounging pieces. Customize with our selection of three exclusive recycled plank colors and powder coated frame finishes.

Surf – Defined by its distinctive retro design, this collection is reminiscent of old school patio furniture leveled up with a modern shape and materials. Its cool coastal vibe is versatile enough for any low-key outdoor setting. Suncloth woven acrylic straps available in five colors add stretchy comfort with good recovery—designed to hold their shape season after season.

Em – Modern design meets laid-back texture with Em. This handcrafted woven collection's sinuous curves exude organic luxury at every turn and in every detail. Its weather resistant flat Polypropylene Rope weave tightly hugs a sturdy aluminum frame that is built to last. From decadent chaise lounges to plush sofas and versatile tables, Em brings character to any setting from cafe to pool side and dining.

Chelsea – brings fun and flair that can handle the heat. A lively combination of art paired with function, its crisp lines and unique shape create a bold silhouette brimming with imagination. Its striking geometric pattern invites looks and relaxation. The collection's all aluminum fully-welded frames can be customized to accent any color scheme. The seating piece features a premium tailored cushion with attached lumbar pillow secured to the frame with Velcro straps for just the right amount of comfort.

Adirondack Collection – Playful. Sophisticated. Unpredictable. Texacraft® brings an abundance of personality to the classic Adirondack chair. Creative styling is front and center with our customized durable aluminum version that offers a choice of four seat styles, each with a distinct aesthetic – Open Weave, Closed Weave, Sling and Acrylic Suncloth Weave.

New In-pool Lounges, outdoor games, containers, retro umbrella styles, new fabrics and more complete our 2024 offering. Please enjoy as you browse out exciting new 2024 catalog.

You can rest assure that we at Texacraft® stand behind each and every one, offering you, and all our customers, an unrelenting commitment to quality, design excellence, customer service and enduring partnership.

From our Texacraft team to yours, thank you for your business.

The Texacraft Team

The Factory Tour

A host of machines that cut and bend the extrusions go to work forming the frames. Stacks upon stacks of cut extrusions make their way to the welding room where any one of 59 welding booths awaits the delivery.

Other departments in the factory are creating furniture components. Some of which include the aluminum stamping machine. This device takes blank aluminum sheets that are placed underneath a die that punches out patterns and shapes for our stamped table tops.

Keeping abreast of the latest manufacturing technology helps us keep costs down while keeping the process lean and efficient. The addition of several robotic welders has proven this approach to be worthwhile. More robotic welding stations are being planned for.

After receiving several washes, the frames are quick dried and enter the powder coating booths. The thick coating of polyester powder covers the raw aluminum with an extremely durable, protective finish coat.

The upholstery department is another large part of the factory where thousands of bolts of fabric, stacks and rolls of foam and fiber are warehoused. Several large cutting tables cut the fabric from patterns in preparation for sewing at any one of the 40 sewing stations.

protection and placed into a heavy duty corrugated box for shipping. A newly installed box making machine makes boxes custom sized for each piece of furniture. A process that only takes seconds to complete.

We take quality very seriously. We have our own in-house testing laboratory. This department has many different stations that test the quality of the paint, extrusions, vinyl, etc. Stress tests are also conducted to ensure the frames are strong enough to withstand commercial use.

Pride in Quality. That's what the more than 850 employees of Texacraft focus on every day. We thank you for your business.

- Premium cushion features (page 191)
 - Cushion and pad fabrics selections (pages 192-208)

Oyster Weave

Having the look and feel of real wicker, this proprietary weave creation was the result of dedicated time and effort. The material is a mix of polyethylene and UV inhibitors with no acrylic additives. Both the texture and coloration are achieved from the hands of an extrusion artist who intuitively adds the correct amount of pigment to the weave during precise temperature intervals in the production process. The weave coloration is infused throughout the core of the weave. The result is a beautiful, natural weathered weave material. All pieces of Coeur d'Alene are hand woven, strand by strand, by highly skilled artists. One chair can take more than a day to weave.

■ Contemporary design

Weight: 11

- Created from heavy-walled multi-dimensional aluminum extrusion
- Frames nest (except bar stool and balcony stool)
- Ergonomically formed two-piece sling bucket
- New design modification allows for easier sling replacement
- Nylon foot glides protect furniture and floor surface
- Two layers of sling fabric with inner lining of outdoor dacron fiber
- Available in all frame finishes (page 189)

Array Daybed

The Array Daybed requires some assembly. Assembly consists of one lower bed frame, four posts, one top canopy. The lower bed unit is fully welded. The four posts attach to the bed frame and to the top canopy with supplied stainless steel bolts. The top canopy is fully welded. The male post fittings provide a sturdy frame when assembled. The bed frame can be surface mounted.

CUSHION DAYBED Order the sling base and order cushion set M1304 or M1304P. When canopy is ordered M31085CS, you must also select a sling fabric for the SHADE as well. Canopy is only available in sling fabrics (woven vinyl fabrics). Frame is available in all frame finishes

Designed by John Caldwell

M31085S Daybed Sling Base Without Canopy And Shades 55"W 90"D 45"H 17.5"SH Weight: 112

The shades are adjustable and are secured to the frame using "C" pockets welded to the 4 posts. The shade rods slip into the "C" pockets with tension that holds them securely in place.

Shade rod secured into "C" pocket.

M1330 Daybed Head Pillow 23. 5"W 9"D 5"H Fits with or without cushion

The side shades can be pulled up and totally out of the way by simply placing the tension rods in the double "U" brackets located in the top middle of the front and back of the top canopy.

If the canopy is not utilized end caps cover the four corner extrusions of the lower bed frame.

Double skate wheels on the back of lower bed frame allow easy mobility.

Euro Form

The Euro Form Collection is created from either high quality, batch-dyed fiberglass/polypropylene resins or 100% polypropylene depending on model. These very tough materials include UV additives for outdoor exposure. The process of creating the frames involves "air molding" technology which makes it possible to achieve closed shapes and guarantee a more hard-wearing and easyto-clean product. These products are resistant to sunlight and atmospheric agents.

Texawood

TexaWood is a line of environmentally friendly furniture utilizing 'lumber' made from recycled plastics. The TexaWood 'lumber' begins its transformation with the recycling of post-consumer bottle waste such as milk and detergent bottles and other post-industrial materials. The cleaned and decontaminated materials are compounded into pellets that are melted, molded and extruded into planks of plastic 'lumber' and are available in a host of natural and vibrant colors. By creating the 'lumber' from a single, purified polymer material, the eventual lumber is manufactured to an exacting, reproducible product ensuring uniform quality standards. The end product is a high-density polyethylene (HDPE) material that has the look and texture of real wood.

How does this material withstand the elements? Extremely well! The 'lumber' is tested in thousands of hours of UV and water scenarios with outstanding results. Although some slight color fading could occur during its service life it will be uniform in appearance. This excellent outdoor material needs no waterproofing, painting or staining to maintain its appearance.

Our Adirondack collections are made exclusively with this lumber material and assembled using stainless steel hardware. The Fresco collection incorporates a very heavy wall aluminum frame with planks of the TexaWood lumber. The planks are held in place with stainless steel hardware.

Texacraft's TexaWood collections are perfect for commercial use as they are extremely durable and need little maintenance. A simple wash with the hose will keep the furniture clean and looking good for years of outdoor enjoyment.

Breeze, Adirondack, Fire Table Lumber Color Selections

Wiremold® Tele-Power Poles are a simple, cost-effective way to drop power, communications and A/V in any location away from a wall. Vista Architectural Columns offer the capacity to feed numerous workstations, supply connections to a large area or even support digital signage—all while adding an elegant look to any décor. Power/Light Stations are surface mounted.

- Charging and Illumination Combine charging with accent or area lighting in one pedestal to maximize functionality of outdoor spaces.
- 2- or 3-Gang Options Customize the station with two or three gangs of devices to meet your facility's unique needs. Prewired versions include weather-resistant GFCI outlets and 4-port USB outlets. Also available: unwired for complete customization.
- Outdoor-Rated Construction Rugged aluminum form designed for durability in outdoor locations. UL listed to NEMA 3R requirements to ensure optimal performance. Door closes automatically to meet while-in-use requirements.
- Durable, Premium Finishes Available in three outdoor-rated finishes to complement your space design. Choose from black, bronze, and silver to perfectly match your project.
- A/V & Communication Compatible Add an A/V Communication Kit (XCSAV) to 3-gang versions to accommodate Wiremold AVIP plates, as well as decorator A/V or communication devices. Enables pedestal to support outdoor presentation areas and classrooms, eliminating the need to bring cables from inside a building.
- Device Shelves Add up to two pairs of shelves to hold mobile devices while charging.
- Door Options Interior illuminates when door is opened. Replace standard color-matched door with a transparent version to make devices inside more visible. Or, select a lockable door for added security or to ensure use is limited to facility personnel.
- ADA compliant Meets all specifications for ADA guidelines, including unobstructed reach requirements.

Outdoor Power Stations

Charging Station with Area Light

Combine outdoor device charging with an LED light to eliminate the need for a stand-alone bollard. Perfect for use as pathway lighting in educational, corporate and recreational applications.

Weight: 26.2

CHARGING STATION INSTALLATION:

Pedestal installs via four L bolts sunk into concrete. Conduit should be stubbed up to a height of 8" for standard power installations. If using AVKIT, conduit should be run up to bottom of power module/door.

To wire, remove four screws from top of pedestal, then remove gasketing and lens (if applicable). Loosen screw inside door area. Power module lifts out of pedestal body, allowing wiring to be pulled up through pedestal. Make all wiring connections, then lower power module back into pedestal body, tighten door area screw, and reassemble top.

LIGHTING STATION INSTALLATION:

Pedestal installs via four L bolts sunk into concrete. Conduit should be stubbed up to a height of 8". All wiring should be completed at base of pedestal, with incoming power wired to included leads

RECYCLED PLANK COLORS

Fiberglass Planters And Containers

Texacraft all weather planters and containers combine natural and synthetic materials to create lightweight, sculptural forms that can be used both OUTDOORS and INDOORS. Carefully made by hand, each piece is constructed from a fiberglass shell with a natural metal finish applied over the top. They are then hand polished to achieve a rich, dimensional surface that will either patina over time or take on a matte finish, depending on the salt content in the air. Most of these commercial grade containers are steel reinforced and are two to three times stronger compared to other manufacturers. The finishes are formulated with high UV and scratch resistant properties creating a very durable exterior fiberglass product. Not all sizes and colors are stocked for quick shipment. Consult sales rep for availability.

(Pictured above with tumbled lava rock.)

The Tavola 42 fire table provides an outdoor retreat of warmth and ambiance. Each table has been hand-crafted using our custom patina finishing process, guaranteeing a one-of-a-kind creation with subtle variation. The ambient heat provides plenty of warmth for multiple people. The 65,000 BTUs unit operates on either Propane Gas or Natural Gas. Fire tables have battery spark ignition and ship with two bags of standard lava rock.

PH-IGNITE PH-Ignite (full electronic ignition system)

PH-TIMER Shut Off Timer

The PH Ignite Electronic Ignition System is the premier ignition system for Prism Hardscapes fire features. Its smart features allow it to reliably ignite and monitor flames. It is hassle-free and conveniently allows easy ignition with a flip of a switch. With the PH Ignite, fire features can be lit from a safe distance without the need of matches.

The **Power Station** is an outdoor enclosure that houses a countdown timer and emergency stop switches. It mounts directly to a concrete pad (for structural support).

It is a decorative and functional piece that looks intentional rather than the typical unsightly junction boxes mounted to the side of a building with exterior conduit going in and out of it.

Nest Lantern

The Nest Lantern features a brushed stainless steel 'nest' pattern for the flame grill. The body of the lantern is made from glass fiber reinforced concrete (GFRC) in the Smoke finish color- a color resembling natural concrete. This unit is fueled by a self-contained Propane tank. The product is designed to use any standard 5 gallon propane tank available at most hardware stores or home improvement centers.

Nest Lantern Features

- Operates on 5 lb. LP Tank (not included)
- Stainless Steel Burner, Hose and Regulator
- · Flame is adjustable
- BTU Rating 20,000 LP
- Manual/Piezo Lighting
- · Manual control valve
- Includes 7 lb. Bag of Black Glass

715-SM-11-V1PC Nest Lantern 160 lbs.

The Drum Side Table is designed for use in up to 9" of water depth. To make sure the side tables will not float, you must fill them up by holding them on their side under water for a few minutes.

Cleaning Instructions: Clean your furniture with mild soap and a brush. For best results, use a pressure washer for cleaning Wash outdoor cushions with a solution of mild detergent and water and thoroughly rinse with clear water. Allow cushions to air dry completely. Do not use abrasive substances. Wash outdoor cushions with a solution of mild detergent and water and thoroughly rinse with clear water. Allow cushions to air dry completely. DO NOT USE A PRESSURE CLEANER ON THE CUSHIONS.

Only Marine Grade Fabrics can be used if furniture is used in-pool. 100% Acrylic Marine Grade Fabrics options are shown on page 167. If daybed is to be used out of water ONLY, fabrics on pages 192-208 can be used on cushions. Daybed Base color options are shown on page 167

In or Out. The new Mirage In-Pool collection from Texacraft is made for both in-pool or out of pool use. These products are made of prime quality polyethylene - a material that is shock resistant, durable and will last for many years. Tested to withstand all climates from tropical sun to rugged winters, these products can stay outdoors year-round. All of the plastic material is entirely recyclable. The process of making these products, rotational molding, does not produce any plastic waste.

Mirage Fabrics and Finishes

100% Acrylic Marine Grade Fabrics available for Cushions and pads. These fabrics are woven from 100% solution dyed acrylic yarns. The stripe fabrics are designed with a 3.9" stripe width.

Swatch samples of the marine grade fabrics are available through your Texacraft sales representative.

Texacraft's in-pool, seating and planters are made of prime quality polyethylene. The coloration is throughout, not just a surface coloration. This material is shock resistant, durable, UV protected and fully recyclable.

Concrete corn hole boards are the regulation American Cornhole Association (ACA) size and slope to ensure perfect playing conditions. Cornhole boards also feature a sloped bag removal area that allows water to efficiently drain away from the board, which keeps the boards cleaner. They are available in standard neutral gray. Cornhole boards are completely constructed out of concrete and have a smooth concrete surface that is polished and sealed for great bag slide. Our custom corn hole boards feature a concrete border that makes mowing simple, and trimming around them is easy and stress-free.

Sets can be installed on sand, compacted gravel or a concrete pad.

BYOB5531 Natural Concrete Gray Cornhole Set of 2 Standard Natural Gray. Contrast sandblasted sides. Includes two coats of sealer and two coats of outdoor wax. Size: 55"L x 31" W

Mirage Cornhole

Cornhole boards are made from a marine grade polymer material. The MGP material is made from post-consumer bottle waste such as milk and detergent bottles. The material is an excellent all-weather material that is extremely stong and will never require painting, staining or weatherproofing to maintain its appearance.

X-CH.000.(COLOR) Mirage Cornhole Board Set Available in white, grey and beige only Set includes two boards. (Bags sold separately) Size: 23.625" W x 47.625"L Weight: 30 lbs. each, 60 lbs. per set

- Natural rubber rails offer play similar to indoor pool tables Play surface is covered with Sunbrella® felt material creating less rail friction and balls play faster
- Table top converts to dining table in seconds
- Outdoor rated high pressure laminate tops
- Five colors of pocket colors to select from
- Pool balls are made of Phenolic Resin
- Some assembly required

Outdoor Foosball Table

The outdoor lifestyle foosball table has overcome the challenge of combining elegance, performance, enjoyment and durability. Designed to withstand the elements and provide endless hours of entertainment, this commercial-quality foosball table is a must-have for any outdoor gaming enthusiast.

Crafted with durability in mind, the Outdoor Foosball Table features a rugged black finish that not only adds a touch of elegance but also ensures long-lasting performance. Its sturdy construction and weatherresistant materials make it suitable for any outdoor environment, allowing you to enjoy intense matches without worrying about the table's integrity.

The table boasts a smooth playing surface, meticulously engineered for optimal ball control and precision shots. Its ergonomic handles provide a comfortable grip, allowing players to execute swift maneuvers and outmaneuver their opponents with ease. The precision-machined steel rods glide effortlessly, ensuring fast-paced gameplay that will keep you engaged for hours on end.

Designed with safety in mind, this Outdoor Foosball Table features telescopic rods that prevent the rods from protruding through the opposite side, minimizing the risk of injuries during intense matches. This thoughtful design element makes it suitable for players of all ages, ensuring a safe and enjoyable gaming experience for everyone.

237200 Set of 5 Plastic Foosball balls

FEATURES

- Moabi wood legs known for its rot-resistance
- Moabi wood is one of the most weather resistant wood species
- Resin laminate cabinet for extreme exterior durability
- Playing surface covered in Gerflex over resin laminate panel
- Ships with 5 plastic and 5 natural cork balls
- · Some assembly required
- · Adjustable feet

Outdoor Ping Pong Table

The **510M** table, manfactured in France, is a stable and durable choice for your outdoor table tennis table needs. This ping pong table is well designed and particularly resistant to rough treatment. Its 100% steel, Aluzinc coated structure, high-density, and solid laminate tabletop, can afford to take a few hits, whether they're from rackets or weather conditions. This is a popular model for schools, hotels, campsites and multifamily use.

The Paramount umbrella redefines outdoor luxury with its seamless blend of innovation and style. Featuring a discreet and whisper-quiet motor, it effortlessly opens and closes at your command via a push button controller. Safety is paramount with its wind sensor, automatically closing the umbrella during high winds. Embracing sustainable energy, the solar charging capability ensures continuous use. The integrated LED lights extend your outdoor moments, casting a warm glow, making it the epitome of sophistication and comfort for any outdoor space.

Optional Valance Styles

Valances are a decorative feature that can be added to single or double vented canopies. The following umbrella canopies are examples of some of the optional valance styles. These options can be applied to the following umbrellas: Lucaya, Quatro, Oceana, Riva, Encore and Phoenix.

A contrasting trim color can be ordered on the valance, as some of the pictures show. There are, however, a limited number of trim fabric colors. Consult your sales representative for more information on various valance options.

Note: The valance fabric may be the same as the canopy fabric or a second fabric color can be selected. If a striped fabric is selected, the stripe can be laid to run vertically on the valance.

Sunscreens

Sunscreen Umbrellas are semi-permanent structures that are durable and can withstand harsh weather conditions. As with any non-permanent umbrella, awning or shade structure, they will need to be taken down when winds reach unsafe conditions. For areas that receive snow, we recommend removing and storing the Sunscreens in a dry, safe, protected environment.

Sunscreen Fabrics (Fabric number is followed by fabric grade)

Sunscreen Pole, Canopy Frame and Base Finishes

Frame Finishes

Texacraft purchases the most durable electrostatic polyester powder available to cover the aluminum frames. This polyester powder is sprayed onto the frames which are then sent through a high temperature oven where the powder melts and bakes onto the frame. Combining such high quality finish components with Texacraft's extensive frame preparation process involving numerous cleaning cycles, the Texacraft finish will provide many years of worry free protection to the furniture frame.

*Glides and end caps are not necessarily color matched to finish color. Black, White or Opaque glides and end caps may be used.

Photographs do not necessarily give the exact color representation of the actual frame finish.

Vinyl Colors

Colors are shown as accurately as possible. Actual color may vary slightly from color chart shown.

Fiberglass Finishes

Vinyl strapping available in 250' rolls or in straps pre-cut for easy installation. The vinyl straps are 100% u.v. stabilized virgin vinyl, .110" thick by 2" wide.

Premium Cushion Construction

Texacraft's standard cushion have provided comfort and performance for our customers for many years and will continue to do so far into the future. With the impetus of the outdoor room that continues to grow more and more each year, Texacraft developed a premium cushion to enhance the performance of outdoor cushions.

The premium seat cushions, which bear the brunt of exposure and use as well as the target of prolonged rains, were engineered to shed water and keep your seat cushions dry. Should the outer fabric allow water to penetrate, a specially engineered water barrier fabric, that is sealed around the inner foam and fiber, will redirect the water to exit the bottom of the cushion via an open mesh sling fabric. The premium cushion utilizes a firmer foam to provide a fuller cushion appearance and to prolong the useful life of the cushion.

This premium cushion is an option on most collections and is designated with the model number suffix "P".

Fabric Cover

Texacraft's fabric offering is extensive with hundreds of fabric to choose from whether 100% acrylic, acrylic blend or PVC coated sling material. Texacraft wants you to create the look you desire. We offer fabrics from the most trusted brands in outdoor fabrics.

Water Barrier

The water barrier engineering comes from BellBloc® moisture, mold & mildew resistant fabric. The specially engineered fabric repels water around the inner foam structure helping to keep the cushions dry.

Smart Water Escape

A black, open mesh Textilene® sling fabric is used to allow any penetrating water to escape out the bottom of the cushion. This is a vinyl-coated, polyester fabric with UV inhibitors.

Engineered Comfort

It too the Texacraft team several years of experimentation and testing to develop what we believe is the most effective design to keep outdoor cushions dry. The result is not only functional but also extremely comfortable.

Foam Core

The foam provides overall cushion support and boasts a 1.75-1.95 lbs./ cu. Ft. density rating. This foam meets flammability requirements CA.TB117-2013. Firm yet soft, the foam will help extend the useful life of the cushion.

Fiber Wrap

The Polyester fiber wraps the foam core to add full appearance to the look of the fabric covered cushion while adding another element of softness.

Texacraft offers fabrics from the most trustworthy, recognized names in the outdoor fabric industry. All of Texacraft's fabrics are woven in the USA. Our fabrics fall under three main categories - Woven Vinyl, Woven Blends and Woven Acrylics.

Woven Vinyl — "Mesh" fabric for sling buckets as well as cushions and umbrellas. Woven Vinyl fabrics are created from durable, resilient PVC-coated polyester yarns. These fabrics are extremely strong and flexible (with minimal stretch) so they won't sag or tear under pressure. Being coated in PVC vinyl, the fabric is created to withstand all kinds of weather, is water resistant, and can withstand harsh UV rays.

Woven Blends — Much the same material as Woven Vinyl but WITH the addition of acrylic threads. The acrylic thread component adds some softness to the fabric that tailors very well for cushions and umbrellas.

Woven Acrylics — These outdoor fabrics are made of 100% solution-dyed acrylic fiber yarns. The fibers are saturated with color and UV-stabilized pigments before they are spun into yarn. This means the pigment goes all the way through the fibers and the color stays true over time. Acrylic fabrics have the feel of indoor fabrics but are specially formulated for outdoor use. These fabrics are excellent choices for cushions, pillows and umbrellas.

In addition, Texacraft accepts COM.

Woven Vinyls - Grade A For Sling, Cushion and Umbrella except where noted.

Introducing Phifertex® Cushion Fabrics

The eight fabrics below are new Phifertex® Cushion Fabrics- specifically woven to be the perfect combination of comfort, durability and cleanability. These special fabrics have smaller yarns than those traditionally used in vinyl cushions. This allows for a much softer hand than traditional PVC (polyester vinyl coated) woven vinyl fabrics used primarily on sling furniture. These fabrics are NOT made for sling application but they have the same appeal - durable, easy to clean and maintain. No worries about staining. Just simply wash and rinse. The softer hand of the fabric (results from the smaller yarns) provide excellent tailoring results for cushions, pillow and umbrellas. Phifertex® Cushion fabrics are UV resistant and infused with built-in MIcroban® antimicrobial protection for an added level of defense against damaging bacteria, mold and mildew.

Woven Vinyls - Grade B For Cushion and Umbrella ONLY.

Woven Acrylics - Grade A Cushion and Umbrella Not available for padded sling.

Regular Furniture Maintenance

Fine outdoor furniture deserves exceptional care. Texacraft aluminum outdoor furniture can be enjoyed for many years when well maintained. Wash the furniture with a solution of mild detergent and water, rinse with clear water and dry thoroughly. A clear automobile wax can be applied to smooth frame finishes to provide better protection against harmful ultraviolet exposure and salt air. DO NOT use any kind of wax, abrasive materials or strong detergents on select finishes.

To vinyl, strap and sling seating surfaces, apply a quality vinyl protectant to guard against the effects of air pollution, salt air build-up, and mildew growth. Wash outdoor cushions with a solution of mild detergent and water and thoroughly rinse with clear water. Allow cushions to air dry completely.

For best protection, perform this maintenance two to three times a year, although these durable materials can be safely cleaned as often as desired.

Light stains can be removed with a solution of mild detergent and water, rinsed with clear water and dried thoroughly. Mildew and heavy stains can be removed with a quality commercial outdoor furniture cleaner and protectant.

Note: Some suntan and sun block products may be harmful to cushions, sling and vinyl and straps. Do not allow such products to come in contact with any seating surfaces to avoid deep penetrating stains, which are not covered under warranty.

Do not steam or use water at temperatures above 100°F when washing.

Note: Be careful to keep the cleaner from contact with the cushions of your furniture, as it will cause discoloration. Do not use bleach on printed acrylic fabrics. Do not use solvent-type materials on woven vinyl, woven blend or ultra woven blend fabrics as they will damage the yarns. Do not use chlorine based cleaners.

Terms and Conditions

Prices

All unit prices and discounts are subject to change without notice.

Routing

Unless specific routing is requested, all shipments will be routed at the discretion of our traffic department.

Claims

If there is apparent damage to the containers and furniture, this must be noted on the freight bill at the time of delivery. If concealed damage and/or shortages to containers is discovered when cartons are unpacked, the common carrier must be notified immediately and a claim form filed to collect damages. All damages and/or shortages must be reported within fifteen (15) days of delivery.

Returns

No returns will be accepted unless authorized in advance by the factory and returned freight prepaid. Special return authorization labels must be utilized on all returns.

Rights Reserved

We may, from time to time, make changes in some items we offer. Texacraft® reserves the right to make product changes in design, material and specification or to make product changes without incurring liability or obligation with reference to similar products previously manufactured.

Warranty

Refer to website or contact your sales representative for further information.

Green Statement

As global awareness grows in the importance of protecting our planet, Texacraft®, as part of Brown Jordan International, Inc., is continually seeking opportunities to move forward in our efforts of environmental responsibility. Refer to website or contact your sales representative for further information.
