Beachwood Weave

**FRAMES:** Frame structure is made from commercial grade, non-rusting aluminum. The open vinyl weave is infused with multi-colors and a natural texture to mirror a weather look.

Texacraft® reserves the right to make minor changes or modifications and to discontinue finish color, strap color, fabrics, or styles without notice. Measurements given are approximate. Information provided is as accurate as possible.

SUMMARY SPECIFICATIONS ALON  
MODEL **M81014B** BALCONY STOOL

Unit Weight: 21 lbs.

Beachwood Weave

**FRAMES:** Frame structure is made from commercial grade, non-rusting aluminum. The open vinyl weave is infused with multi-colors and a natural texture to mirror a weather look.

**POWDER COAT:** Furniture has powder coat paint finish. The painting process begins with a six (6) stage chemical pre-treatment system, which provides for efficient etching and surface preparation. Frames are thoroughly cleaned in a phosphate bath and sealed with a chrome seal for corrosion resistance, then thoroughly dried in ovens. Powder coatings are electro statically applied to a nominal thickness of three (3) mils with the finest professional grade polyester powder. The frames then pass through an oven heated to 400 degrees Fahrenheit, where the powder melts, covering the metal with a tough, pliable skin.

SUMMARY SPECIFICATIONS ALON  
MODEL **M81014** BAR STOOL

Unit Weight: 22 lbs.

Beachwood Weave
