

D6005DT
RALLY RECEPTACLE
 32-gallon plastisol coated,
 perforated steel receptacle with
 liner and plastic dome top

Material

The 32-gallon receptacle body is made of 14-gauge perforated steel with a .31" diameter uniform hole pattern. The receptacle is protected by Fusion Advantage™, a plastisol coating with an average .125" thickness and a high-gloss powder coat. The dome top is made of Linear Low Density Polyethylene and features a 7.44" x 12.50" self-closing push door and a tether to attach the top to the receptacle.

Finish

Fusion Advantage is a heat fused plastisol coating that creates an impervious rustproof barrier and resists UV deterioration, mildew, staining and fading.

The finish has been tested to the requirements of ASTM E1354 and is determined to be in compliance with California Uniform Fire Code 1103.2.1.4.2.

Color

See website or sales representative for color choices.

Assembly

Attaching the dome top tether to the receptacle body requires some assembly. Purchase of mounting options may require additional assembly.

Maintenance

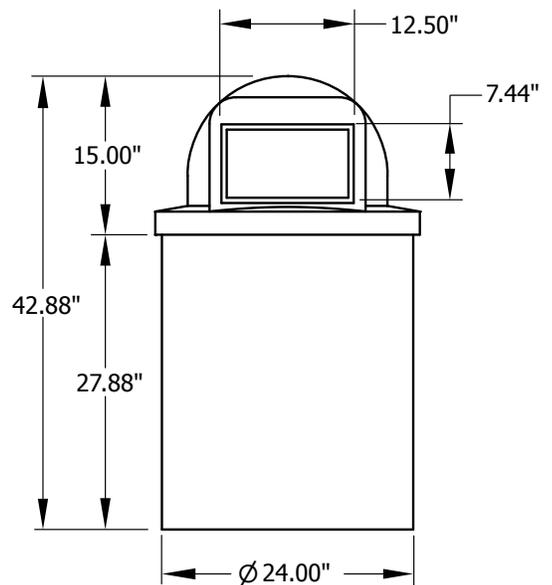

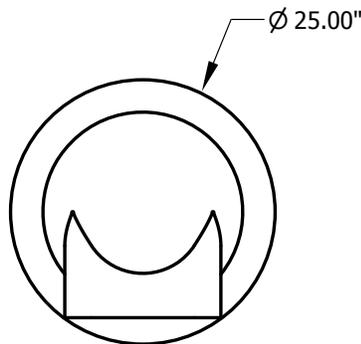

The product is virtually maintenance-free and requires only periodic cleaning with a sponge and a solution of mild detergent and water to remove surface dirt. Do not clean with solvent or petroleum based products.

Replacement Parts

- Black Plastic Liner **F1017**
- Dome Top **F3015**
