### Material

The bench is 72.25" long. The contour seat is made of 3/4 #9 expanded steel with a diamond shaped pattern. The bench is protected by Fusion Advantage™, a plastisol coating with an average .125" thickness and a high-gloss powder coat. The bench seat will support 200 lbs per linear foot.

The bench features end arm rests of 1.66" O.D. steel tube and a center arm rest of 1.66" O.D. steel tube. The legs are made of .38" thick steel sheet. The legs and arm rests are protected by a fade resistant powder coat finish featuring a state of the art primer proven to prevent rusting. The gullwing mount is designed to be portable for flexibility in placement or surface mounted to prevent movement. Mounting hardware is not included.

### Finish

Fusion Advantage is a heat fused plastisol coating that creates an impervious rustproof barrier and resists UV deterioration, mildew, staining and fading.

The finish has been tested to the requirements of ASTM E1354 and is determined to be in compliance with California Uniform Fire Code 1103.2.1.4.2.

A state of the art primer is applied to all of the under supports, providing extreme rust fighting protection and durability. Treated components exceed the industry standard by 34% in testing by independent sources.
