

F1112
TRI1112
PICNIC TABLE
8' expanded steel, ADA compliant
picnic table, traditional edge, in
ground mount

Material

The table is 96.25" long and features two flat bench seats. The table top and seats are 3/4" #9 expanded steel with a diamond shape and feature a traditional edge. Table top and seats are protected by Fusion Advantage™, a plastisol coating with an average .125" thickness and a high-gloss powder coat. The table top is designed to support 100 lbs per square foot and the seats will support 200 lbs per linear foot.

The table top supports and seat supports are made of 4" square tube, also with a fade resistant powder coat finish and state of the art primer. They are designed to be mounted 15.88" deep for a sturdy support. This table is ADA compliant when installed at the specified height.

Finish

Fusion Advantage is a heat fused plastisol coating that creates an impervious rustproof barrier and resists UV deterioration, mildew, staining and fading.

The finish has been tested to the requirements of ASTM E1354 and is determined to be in compliance with California Uniform Fire Code 1103.2.1.4.2.

A state of the art primer is applied to all of the under supports, providing extreme rust fighting protection and durability. Treated components exceed the industry standard by 34% in testing by independant sources.

Color

See website or sales representative for color choices.

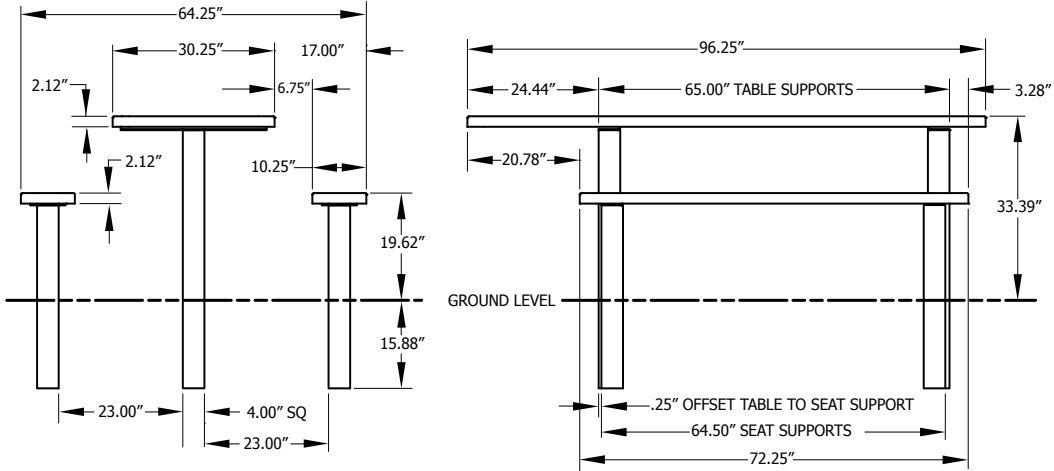

Assembly

Table requires minor assembly. Stainless steel assembly hardware is included. In ground installation requires site preparation and construction of a temporary support.

TRI1112 model includes tamper resistant and stainless steel assembly hardware.

Maintenance

The product is virtually maintenance-free and requires only periodic cleaning with a sponge and a solution of mild detergent and water to remove surface dirt. Do not clean with solvent or petroleum based products.
