

SUMMARY SPECIFICATIONS MEZA
MODEL **M5601AS** NESTING DINING CHAIR

Unit Weight: 15 lbs.

Frame Profile

FRAMES: Frame structure is made from commercial grade, non-rusting aluminum.

FABRIC: Woven vinyl fabrics (used primarily as sling material) are made from weather weave, an open weave, vinyl-coated, polyester fiber fabric. Ultraviolet stabilizers have been added to inhibit fading, deterioration and mildew.

Texacraft® reserves the right to make minor changes or modifications and to discontinue finish color, strap color, fabrics, or styles without notice. Measurements given are approximate. Information provided is as accurate as possible.

SUMMARY SPECIFICATIONS MEZA
MODEL **M5601S** NESTING ARMLESS DINING CHAIR

Unit Weight: 13 lbs.

FRAMES: Frame structure is made from commercial grade, non-rusting aluminum.

FABRIC: Woven vinyl fabrics (used primarily as sling material) are made from weather weave, an open weave, vinyl-coated, polyester fiber fabric. Ultraviolet stabilizers have been added to inhibit fading, deterioration and mildew.

SUMMARY SPECIFICATIONS MEZA FULLY WELDED ALUMINUM TABLES MODEL **M9642-WCA** 42" SQUARE ADA COMPLIANT DINING TABLE

(With Umbrella Hole)

Tables have .25" thick aluminum tabs with .75" dia. holes to allow surface mounting.

SURFACE MOUNTABLE: 1/4" aluminum plates with pre-drilled holes at bottom of each leg allow surface mounting. Drill holes with 3/8" masonry bit and use 3/8" x 3 3/4" expansion concrete anchors to secure the table to the surface.

Unit Weight: 47.5 lbs.

FRAMES: Frame structure is made from commercial grade, non-rusting aluminum. The actual top is created from heavy walled extrusions with specially formed inner webs to promote strength. Each "slat" is welded to the table rim. The table frame is fully welded.

POWDER COAT: Furniture has powder coat paint finish. The painting process begins with a six (6) stage chemical pre-treatment system, which provides for efficient etching and surface preparation. Frames are thoroughly cleaned in a phosphate bath and sealed with a chrome seal for corrosion resistance, then thoroughly dried in ovens. Powder coatings are electro statically applied to a nominal thickness of three (3) mils with the finest professional grade polyester powder. The frames then pass through an oven heated to 400 degrees Fahrenheit, where the powder melts, covering the metal with a tough, pliable skin.
