

RCPG6 RECYCLED PLASTIC PICNIC TABLE

6' recycled plastic plank picnic table, flat bench seats, portable mount

Material

The table is 72" in length and features two flat bench seats. The tabletop and seats are made of recycled plastic 2" x 10" (nominal dimensions) planks. The tabletop is designed to support 100 lbs per square foot and the seats will support 200 lbs per linear foot.

The frames are made of 2.38" O.D. galvanized steel tubing. Frame is portable in design allowing for flexibility in placement.

Finish

The galvanized coating on the steel tubing frame is a three-step steel finishing process that applies an extra-thick layer of zinc, followed by a conversion coating and clear polymer for ultimate corrosion resistance to provide a bright, uniform finish.

The planks are impervious to moisture and corrosion, do not require the application of sealants or preservatives, and will never need painting or staining throughout the product's life.

Color

See website or sales representative for color choices.

Assembly

The table requires some assembly. Assembly hardware is included.

Maintenance

The product is virtually maintenance-free and requires only periodic cleaning with a sponge and a solution of mild detergent and water to remove surface dirt. Do not clean with solvent or petroleum based products.
